Complete Training All 20 games Premium Sounds

Unlock Full Access (/shop/index)

Limited Training: you can train only during workouts (unlock Focused Training) (/shop/index)

SoundGym Games

Sonar Beast / Equalization & Space

A sound plays from a specific point in the stereo field, and through a bandpass filter in certain frequency. Can you find the correct panning and frequency position?

Unlock (/shop/index)

EQ Mirror / Equalization

Audio is processed with an equalizer. Match the given EQ settings to recreate the equalized sound.

Unlock (/shop/index)

Compressionist / Dynamics

Audio is processed through a compressor. Adjust the makeup gain for even volume, then match the compressor settings to replicate the compressed sound.

Unlock (/shop/index)

Stereohead / Space & Time

Two audio sources are panned left and right. How wide is the stereo image?

Unlock (/shop/index)

Balance Memory / Dynamics

Memorize the balance of the presented multi-track mix. Can you recreate it accurately?

Unlock (/shop/index)

EQ Knight / Equalization

Compare two sounds and select the audio source that matches the displayed EQ settings.

Unlock (/shop/index)

Peak Master / Equalization

A bell (peaking) EQ filter is boosting a specific frequency range. Use the EQ on/off buttons to compare the equalized and original sounds - can you find the boosted frequency?

Unlock (/shop/index)

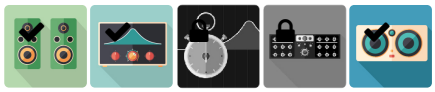

Dr. Compressor / Dynamics

Listen to two sounds - one is more compressed than the other, with very short attack and release for easier detection. Can you identify it?

Metronomer
Find the BPM that is presented to you.
Unlock (/sh

SwingBeat
Find the swing value applied to the beat.
Unlock (/sh

DB King / Dynamics

Select the correct amplitude change in dB! Use the 'Original' and 'After Gain' buttons to compare and find the right level difference.

Unlock (/shop/index)

Filter Expert / Equalization

An audio source is processed with a specific EQ filter. Use the EQ on/off buttons to compare the equalized and original sounds - can you identify the correct EQ setting?

Unlock (/shop/index)

Kit Cut / Equalization

A bell (peaking) EQ filter is cutting a specific frequency range using negative gain. Use the EQ on/off buttons to compare the equalized and original sounds - can you find the attenuated frequency?

Unlock (/shop/index)

PanGirl / Space & Time

A sound plays from a specific point in the stereo field. Can you choose the correct panning position?

Unlock (/shop/index)

Bass Detective / Equalization

A bell (peaking) EQ filter is boosting a frequency between 50 Hz and 400 Hz. Toggle the EQ on/off to compare sounds, then identify the boosted frequency.

Unlock (/shop/index)

Delay Control / Space & Time

Choose the correct delay time in milliseconds! Use the 'Original/With Delay' buttons to estimate the gap between the dry and delayed signals.

Unlock (/shop/index)

Distorted Reality / Quality

Listen to two sounds - one has more distortion than the other. Can you tell which one it is?

Unlock (/shop/index)

Reverb Wizard / Space & Time

You'll hear three sounds - one has different reverb settings than the others. Can you identify which one stands out?

Unlock (/shop/index)

EQ Cheetah / Equalization

A bell (peaking) EQ filter boosts a specific frequency range. Find the boosted frequency - answer as many as you can in 60 seconds!

Unlock (/shop/index)

Feedback Eliminator / Equalization

A sine wave plays at a specific frequency. Select the correct EQ band to eliminate the sound.

Unlock (/shop/index)

Visit the Ear Doctor

What's the highest frequency that you can hear? Which is your better ear? How good are your ears compared to others?
